

SOUND ENCLOSURES

Turbine Products

Product Description

VAW Systems Enclosures are designed for Industrial and Turbine Equipment that require significant noise reductions from casing radiated sound emissions. VAW Systems designs and builds high performance acoustic enclosures and barrier systems that will meet both occupational noise limits and environmental noise ordinances. Using engineered acoustic wall systems and related structures, the industrial enclosures are engineered for virtually any installation and system pressure. Single and double wall systems are integrated with an access door system, silenced ventilation openings, structural support bases and a wide variety of surface finishes. Acoustic enclosures may be fully-assembled from the factory or shipped in components for final field assembly.

Applications

- Gas Turbines
- Generators
- Compressors
- Rotating equipment
- HRSG
- Barrier Wall

Standard Features

- Housing materials and structural design suitable for virtually any environment
- Acoustical treated ventilation, as required
- Fully factory assembled or knock down for field assembly, with or without support base
- Acoustic Panel thickness: 2 to 8 in.
- Acoustic performance: wall TL based on ASTM® methods; and, plenum attenuation based on the latest ASHRAE® algorithms
- May be designed for site-specific seismic requirements and wind loading

Genset Enclosure

Turbine Enclosure

Certified Performance Data

For over 40 years, VAW has been testing, designing, and fabricating noise control products in North America with a unique program driven by our experienced acoustic engineers. Our performance data is based on extensive testing:

- Product validation and applied research within our Noise Control Applications Laboratory
- Third party testing at NVLAP® accredited facilities
- Field verification tests

Refer to our Certified Performance Data Sheets and our Selection Software for a complete set of product ratings.

Construction Options

- Housing Materials: carbon steel, galvanized, or stainless steel (304 & 316)
- Independent support structure
- Custom paint finish
- Welded and bolted designs
- Access doors
- Windows
- Internal electrical (lights, receptacles, special requirements)

Generator Enclosure
